

'54 F100 custom

Jim Hovind - lifelong gearhead- has crewed on Oval track cars, Drag cars, and Road racing cars. I was in Road racing for nearly 40 years, as crew, driver and official. I retired from it in 2004.

Started building a 54F100 custom 8 years ago. The truck was bought from the original owner in Yuma, AZ. The chassis is just about complete and the metal work is being done in 2007. Hoping to have it done for our show this summer.

The other project is a 1938 Ford pickup being built into a traditional fenderless hot rod. I enjoying learning and doing all of the work myself. That is why it is taking me so long to finish this project.

Other hobbies include camping and traveling. Jonell also quilts.
